Summary

Product manager and founder turning stakeholder needs into software and shared workflows. Experience spans talent sourcing, AI-assisted search, growth automation, partnerships, and voice AI prototyping.

Experience

Tamara – Fintech Riyadh, Saudi Arabia / Remote
Talent Brand & Partnerships Intern, then External Consultant Jun 2026 – Present

- Mapped COO, recruiting, Talent Brand, and Partnerships workflows; built a **Greenhouse-integrated CRM** around **700K+ historical applicant records**.
- Unified candidate ownership, event attendance, staff interactions, and follow-up for recruiting, Talent Brand/Partnerships, and leadership; added **OpenAI-assisted search**.
- Built targeted event invitation lists in **LinkedIn Sales Navigator**, with personalized invitations through the COO's LinkedIn profile and subsequent follow-up.
- Secured **7 partnerships** and added **500+ qualified early-career candidates** during summer 2026; led a national credit-risk competition with **SAR 100,000 in prizes**.

UC Berkeley – Sutardja Center for Entrepreneurship & Technology Berkeley, CA
Product Manager Sep 2025 – Present

- Built an **AI and HubSpot API workflow** filtering **100K+ leads** from multiple sources into **500 priority outreach targets**.
- Built attribution across Google, Meta, LinkedIn, and organic channels for **$50K in ad spend**, informing marketing budget allocation.
- Worked across approximately **12 partnerships** on SCET projects that received **$100K+ in payments**.

Operations Intern Jun 2025 – Dec 2025

- Delivered intern onboarding and training, standardized documentation, and automated recurring administrative and coordination tasks.

AynX – Satellite Collision Avoidance (aynx.space) Berkeley, CA
Co-Founder Oct 2025 – Present

- Co-founded a platform for low-Earth-orbit operators to coordinate maneuvers without revealing satellite ownership; built rotating cryptographic identities and an ML-backed maneuver decision engine.
- Reached the finals of the Saudi Space Agency's global **DebriSolver** competition.

Projects & Awards

Sitters – 1st Place, Anthropic Hackathon Sep 2026

- Built a **Next.js, Claude, and ElevenLabs** app for voice conversations with a painting's sitter, painter, or both; designed personas separating sourced responses from labeled speculation.

Personal Job-Search Automation 2025

- Developed with **Claude/GPT-assisted coding and minor Python edits**; processed **2,000+ postings in one month** and shortlisted roles scoring **75+**.
- Used the workflow during a personal search involving **221 applications**, interviews with **17 companies**, and **7 job offers**.

SkipLab – 1st Place, AFI Global Idea Challenge ($7,000) Jan 2025 – Present

- Co-developed an AI cosmetic-safety pre-screening platform; built the front-end demo and designed an ML workflow using peer-reviewed skin-sensitization and toxicology datasets.

Education

University of California, Berkeley Expected May 2027
B.S. Aerospace Engineering | GPA: 3.5/4.0

Skills

Technical: TypeScript, Next.js, Python, SQL, Prisma, OpenAI, Claude, ElevenLabs
Business & Analytics: LinkedIn Sales Navigator, Greenhouse, HubSpot, Advanced Excel
Languages: Arabic (native), English (fluent)
